

Prothromplex® TOTAL 500 IU – Implementation Checklist

Prothromplex® TOTAL 500 IU is indicated for:¹

- Treatment of bleeding and perioperative prophylaxis of bleeding in acquired deficiency of prothrombin complex coagulation factors, such as a deficiency caused by treatment with vitamin K antagonists or in case of overdose with vitamin K antagonists, when rapid correction of the deficiency is required.
- Treatment and perioperative prophylaxis of haemorrhages in congenital deficiency of vitamin K-dependent coagulation factors, when purified specific coagulation factor concentrate is not available.
- Prothromplex TOTAL 500 IU is indicated in adults. There are insufficient paediatric data to recommend the administration of Prothromplex TOTAL 500 IU in children.
